Stilson Hill House

Chesa Studio’s record follows the restoration of an 1824 house from exposed framing and floorboards to the furnished rooms in September 2025.

Green-veined marble basin with timber cabinetry.

Hand-applied tadelakt at the curved shower enclosure.

Scope documented

Construction photographs show wall openings, timber junctions, floorboards and work around the stair. The completed interiors show plaster finishes and a custom vanity.

Trade reference

Tom Cebic applied the tadelakt in both bathrooms. The shower and basin photographs provide a finish reference for a client discussing comparable work.
